

**COMMONWEALTH™
ENGINEERS, INC.**
A wealth of resources to master a common goal.

Valley Rural Utility Company

Water Utility Improvements
Preliminary Engineering Report
March 2024

CEI Project #W23136

commonwealthengineers.com

TABLE OF CONTENTS

Executive Summary	ES-1
ES.1 Project Planning	ES-1
ES.2 Existing Facilities	ES-1
ES.3 Need for Project	ES-3
ES.4 Alternative Analysis	ES-4
ES.5 Recommended Improvements Project.....	ES-8
A. Financial Requirements Total Project Cost Estimate (Engineer's Opinion of Probable Cost).....	ES-10
B. Proposed Project Schedule.....	ES-11
C. Project Funding.....	ES-11
ES.6 Permit Requirements.....	ES-12
ES.7 Annual O&M Costs.....	ES-12
ES.8 Reserves	ES-13
Section 1 – Project Planning	1-1
1.1 Location.....	1-1
1.2 Environmental Resources Present	1-1
A. Disturbed/Undisturbed Land	1-1
B. Historic/Architectural Resources	1-6
C. Wetlands.....	1-6
D. Surface Waters	1-8
E. Groundwater	1-8
F. Floodway and Floodplain	1-15
G. Plants and Animals	1-15
H. Soils.....	1-15
I. Prime Farmland Impacts & Influence of Local Geology	1-21
J. Air Quality	1-29
1. Construction Activity	1-29
2. Clean Air Act Title III – Hazardous Air Pollutants	1-29
K. Open Space and Recreational Opportunities	1-29
L. Lake Michigan Coastal Program	1-29
M. National Natural Landmarks.....	1-29

N.	Mitigation Measures	1-29
O.	Secondary Impacts	1-30
1.3	Population Trends	1-30
A.	Local Economy	1-32
Section 2 – Existing Facilities		2-1
2.1	Location Map and Description	2-1
A.	Drinking Water System	2-1
2.2	History	2-1
A.	Drinking Water System	2-1
1.	Supply and Treatment	2-1
2.	Pumps.....	2-1
3.	Storage	2-1
4.	Distribution System	2-3
2.3	Condition of Existing Facilities	2-3
A.	Drinking Water System	2-3
1.	Supply and Treatment	2-3
2.	Pumps.....	2-3
3.	Storage	2-3
4.	Distribution System	2-5
5.	Electrical Assets	2-6
2.4	Current Water Production	2-7
2.5	Significant Contributors	2-9
2.6	Financial Status of Existing Facilities.....	2-9
A.	Current Rate Schedules.....	2-9
B.	Annual Operations and Maintenance Expenses.....	2-10
C.	Users and EDUs	2-10
D.	Existing Loans	2-11
E.	Existing Short-Lived Assets	2-11
Section 3 – Need for Project		3-1
3.1	Health, Sanitation and Security	3-1
A.	Distribution System Materials.....	3-1
B.	Security.....	3-2

3.2	Aging and Deficient Infrastructure.....	3-2
A.	Pumps	3-2
B.	Storage	3-2
C.	Distribution System	3-3
1.	Customer Meters.....	3-3
2.	Service Lines.....	3-3
3.	Dead Ends, Redundant Feed Lines, and Shut-Off Valves	3-3
4.	Fire Protection Considerations and Undersized Lines	3-4
5.	System Losses	3-5
D.	Electrical Assets.....	3-5
3.3	Reasonable Growth.....	3-5
A.	Water Source Capacity	3-5
B.	Storage Capacity	3-6
3.4	Hydrologic Modeling.....	3-8
A.	System Components.....	3-8
1.	Distribution System	3-8
2.	Elevated Storage.....	3-8
B.	Model Structure	3-9
C.	Model Calibration	3-9
D.	Evaluation of System Pressures	3-10
E.	Evaluation of Emergency Fire Flow Conditions	3-16
Section 4 – Alternatives Considered.....		4-1
4.1	Customer Meters.....	4-1
A.	No Action	4-1
B.	New Meters and Automatic Meter Reading with Advanced Metering Infrastructure (AMI)	4-1
4.2	4.3 Distribution System – Water Main Improvements.....	4-2
A.	No Action	4-2
B.	Replace All Lines at the End of Remaining Useful Life.....	4-2
C.	Replace All Lines less than 4-inch Diameter	4-3
D.	Replace Areas of Concern	4-3
4.3	Distribution System - Looping	4-6

A.	No action	4-7
B.	Redundant Feed Line on South Side of Lake.....	4-8
4.4	High Service Pumps	4-8
A.	No Action	4-8
B.	Replace High Service Pumps and Add VFDs.....	4-8
C.	Replace High Service Pumps, Add VFDs, and Associated Piping, Valves, and Appurtenances.....	4-9
4.5	Storage.....	4-9
A.	No Action	4-9
B.	Perform Storage Tank Repairs and Rehabilitation	4-9
C.	Construct a New 500,000-Gallon Elevated Storage Tank with Three (3) New Booster Station	4-9
D.	Construct a New 500,000-Gallon Elevated Storage Tank with a Dedicated Feed Line.....	4-10
4.6	Fire Flow	4-10
A.	No Action	4-10
B.	Upgrade the System to Provide Fire Flow.....	4-11
4.7	Environmental Impacts and Land Requirements	4-12
4.8	Potential Construction Problems.....	4-13
4.9	Sustainability	4-13
4.10	Regionalization	4-13
Section 5 – Selection of an Alternative		5-1
5.1	Life Cycle Cost Analysis	5-1
A.	Construction Cost	5-1
B.	Non-Construction Cost.....	5-1
C.	Total Estimated Project Capital	5-1
D.	Operation and Maintenance and Equipment Replacement Fund (O&M&R) Cost	5-1
E.	Salvage Value.....	5-2
F.	Present Worth Analysis Method	5-2
5.2	Customer Meters	5-2
A.	Present Worth Analysis.....	5-2
B.	Non-Monetary Factors	5-3

5.3	Distribution System – Water Main Improvements	5-3
	A. Present Worth Analysis.....	5-3
	B. Non-Monetary Factors	5-3
5.4	Distribution System – Looping	5-4
	A. Present Worth Analysis.....	5-4
	B. Non-Monetary Factors	5-4
5.5	High Service Pumps	5-4
	A. Present Worth Analysis.....	5-4
	B. Non-Monetary Factors	5-5
5.6	Storage Tanks	5-5
	A. Present Worth Analysis.....	5-5
	B. Non-Monetary Factors	5-6
5.7	Fire Flow	5-6
	A. Present Worth Analysis.....	5-6
	B. Non-Monetary Factors	5-7
Section 6 – Recommended Alternative		6-1
6.1	Recommended Improvements Project.....	6-1
	A. Distribution System Improvements.....	6-1
	B. High Service Pumps	6-1
	C. Elevated and Ground Storage Tank Improvements.....	6-1
Section 7 – Conclusions and Recommendations		7-1
7.1	Purpose.....	7-1
7.2	Proposed Project(s).....	7-1
Section 8 – Legal, Financial & Managerial Capabilities		8-1
8.1	Introduction	8-1
8.2	Resolutions	8-1
8.3	SRF Project Financial Information	8-1
8.4	Inter-local Agreements	8-1
8.5	Indiana Utility Regulatory Commission	8-1
8.6	Regional Planning Meeting.....	8-1
8.7	Asset Management Program	8-1

8.8 Water Loss Audit8-1

8.9 Public Participation8-2
